Patent No. 6734161

GENERAL INFORMATION:
APPLICANT: Nielsen, Peter E.
TITLE OF INVENTION: Peptide Nucleic Acids Having Antibacterial Activity
PILE REFERENCE: ISIS-1329

CURRENT FILING DATE: 2000-07-06

PRIOR APPLICATION NUMBER: 08/932,140

PRIOR PLING DATE: 1997-09-16

NUMBER OF SEQ ID NOS: 30

SOFTWARE: PatentIn version 3.2

LENGTH: 15

Sequence 6551, Application US/09422978

patent No. 6537751

general inrowmarino:

APPLICANT: Cohen, Daniel

APPLICANT: Chumakov, 11ya

TITLE OF INVENTION: Biallelic markers for use in constructing a high density...

TITLE OF INVENTION: 1999

CURRENT APPLICATION NUMBER: US/09/422,978

CURRENT FILING DATE: 1999-04-21

EARLIER PELING DATE: 1999-04-21

EARLIER PELING DATE: 1999-04-21

EARLIER PELING DATE: 1999-04-21

EARLIER PELING DATE: 1999-04-21

EARLIER FILING DATE: 1999-04-21
APPLICANT: Brenda F. Baker
APPLICANT: Susan M. Freier
TITLE OF INVENTION: ANTISENSE MODULATION OF INTERLEUKIN 12 P40 SUBUNIT EXPRESSION
FILE REFERENCE: RTS-0247
CURRENT APPLICATION NUMBER: US/09/851,062
CURRENT FILING DATE: 2001-05-07
NUMBER OF SEQ ID NOS: 87
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ö
                                                                                                                                                                                                                                                                                                                                                                                                  ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Gaps
                                                                                                                                                                                                                                                                                                                                                                                                    Gaps

Sequence 33, Application US/09061768A

Patent No. 6204037

GENERAL INFORMATION:

APPLICANT: BRASH, ALAN R.

APPLICANT: BORGLIN, WILLIAM E.

APPLICANT: BORGLIN, WILLIAM E.

APPLICANT: JISAK, MITSUO

TITLE OF INVENTION: LIPOXYGENASE PROTEINS AND NUCLEIC ACIDS

NUMBER OF SEQUENCES: 36

CORRESPONDENCE ADDRESS:

ADDRESSEE: ARLES A. TAYLOR, JR.

STREET: SUITE 1400, UNIVERSITY TOWER, 3100 TOWER BOULEVARD

Patent No. 6380376

GENERAL INFORMATION:

APPLICANT: PAUL, Prem

APPLICANT: MENG, Xiang-Jin

APPLICANT: MENG, Xiang-Jin

APPLICANT: MENG, Xiang-Jin

APPLICANT: MENGLOV, 190r

TITLE OF INVENTION: PROTEINS ENCODED BY POLYNUCLEIC ACIDS OF PORCINE

TITLE OF INVENTION: REPRODUCTIVE AND RESPIRATORY SYNDROME VIRUS (PRRSV)

FILE REFERENCE: 4652-0039-55X CIP

CURRENT FILING DATE: 1998-02-06

PRIOR APPLICATION NUMBER: US/09/019,793A

CURRENT FILING DATE: 1995-06-07

PRIOR FILING DATE: 1993-10-05

PRIOR FILING DATE: 1993-10-05

PRIOR FILING DATE: 1993-10-05

PRIOR FILING DATE: 1993-10-05

PRIOR SEQIEN NUMBER: 07/969,071

PRIOR FILING DATE: 1992-10-30

NUMBER OF SEQIEN NOS: 108

SEQIENTARE: Patentin Ver. 2.1

```
Sequence 128783, Application US/10257017B

Sequence 128783, Application US/10257017B

Publication No. US20040241651A1

GENERAL INFORMATION:

APPLICANT: Christian Piepenbrock

APPLICANT: Christian Piepenbrock

APPLICANT: Christian Piepenbrock

APPLICANT: Christian Piepenbrock

TITLE OF INVENTION: Detection of Single nucleotide polymorhphisms [SNPS] and cytosine

TITLE OF INVENTION: methylations

TITLE OF INVENTION: methylations

TITLE OF INVENTION: methylations

FILE REFERENCE: E01/193/WO

CURRENT APPLICATION NUMBER: US/10/257,017B

CURRENT FILING DATE: 2000-04-07

NUMBER OF SEQ ID NOS: 382046

SEQ ID NO 128783

LENGTH: 13

TYPE: DNA

TYPE: DNA

ONGANISM: Artificial Sequence
Sequence 118050, Application US/10257017B

Sequence 118050, Application US/2041651A1
